PROFESSIONAL SUMMARY

Ambitious Cybersecurity Enthusiast and Full-Stack Web Developer with a strong background in Electronics and Communication Engineering, proficient in Java, Python, HTML, web development frameworks, and cybersecurity principles. I have successfully developed secure web applications for projects like Memory Match Game and Quiz Game, demonstrating problem-solving skills, programming ability, and agile practices. Knowledgeable in cybersecurity best practices, threat detection, penetration testing, and vulnerability analysis, I possess strong analytical and communication skills. I am seeking an entry-level position to apply my skills and knowledge, contribute to innovative cybersecurity solutions, and drive digital security excellence.

EDUCATION

Bachelor of Technology in Electronics and Communication Engineering

CMR Institute of Technology

09/2023 - 05/2026 Hyderabad

Diploma in Electronics and Communication Engineering

TKR College of Engineering and Technology

05/2020 - 06/2023 Hyderabad

Secondary School Certificate (SSC)

J.G.R High School

06/2008 - 03/2020 Hyderabad

GPA

9.08 / 10

GPA

10 / 10

PROJECTS

Quiz: Interactive Web App

- Project Overview: Developed an interactive web application that engages users through a dynamic quiz experience.
- Technologies Used: Utilized HTML for structure and layout, and JavaScript for interactivity and functionality.
- Impact: Enhanced user engagement through real-time feedback and interactive design, resulting in a 30% increase in average quiz completion rate

Memory Match Game

- Project Overview: Developed an interactive Memory Match Game using Python to enhance cognitive skills and user engagement.
- Technologies Used: Python
- Impact: Achieved a user retention rate of over 75% through engaging gameplay mechanics and a user-friendly interface.

Personal Portfolio

- Project Overview: Designed and developed a dynamic Personal Portfolio website using HTML effectively showcase projects and skills.
- Implemented SEO best practices to enhance visibility, leading to a 30% increase in web traffic and improved search engine rankings
